

RAIDER

RAIDER HARNESS CONTAINER

The RAIDER Harness/Container is the newest innovation in tactical parachute harness systems. The RAIDER is designed specifically for improved comfort and versatility. The RAIDER Harness Container can be sized to fit any Airborne Systems Ram Air canopy, to include the MT-1X, MC-4, MC-5, MT-1Z, Hi Glide (PARIS), and the new Intruder canopy.

The Raider has met TSO C23d standards to an All Up Weight of 555 lb (252 kg) when used with the Intruder reserve canopy.

RAIDER- H

RAIDER- S

The **RAIDER** provides:

- Greater comfort
- Versatile deployment methods with spring loaded pilot chute, hand deploy pilot chute, or static line
- Single pin reserve with clear inspection window
- AAD configuration for: CYPRES, AR2, or FF-2
- Customization available for specific missions
- Variety of sizes and colors

RAIDER- H

- High equipment attachment points (Tandem Style) for larger cargo
- Outboard ripcords

RAIDER- S

- Conventional (Low) equipment attachment points
- Standard ripcord configuration
