

# AD/UX TYPE D

## CARGO DELIVERY PARACHUTE ASSEMBLY

The AD/UX Type D Parachute Assembly was intentionally designed as an inexpensive and, if necessary, expendable supply dropping parachute. Components are of simple construction and are easily assembled from low cost materials. The canopy, pack and rigging lines are manufactured from polypropylene fabric and twine.

NATO Stock Number	1670-99-136-5439
Part Number:	MRI GQ 682
Load carrying capacity	681 - 1134 kg (1500 - 2500 lb)
Minimum deployment altitude	140m (460 ft) AGL
Rate of Descent (Max Load):	7.5 m/s (25 f/s)

All Airborne Systems parachutes are manufactured in accordance with current applicable US Army, MoD, DND and PIA (Parachute Industry Association) specifications.
