

PRIBAD / PURIBAD

The PRIBAD and PURIBAD systems enable Rigid Inflatable Boats to be parachute dropped into the water, ready for immediate use.

Photo: Crown Copyright

A range of platform configurations can accommodate boats from 6.5 to 11 metres in length. The platforms are compatible with C130, C17, C5 and the future A400M aircraft.

An extractor parachute pulls the load from the aircraft. The boat and platform separate immediately after leaving the aircraft and both descend to the water under their own parachutes. The system can be used with any proven supplies dropping parachutes of the required capacity.

The boat is ready for immediate use on landing and parachutists, who are able to exit the aircraft following the load, can land near to the boat in the water. The platform lands separately and in the operational role will sink immediately without trace. In the training role, the platform floats for recovery and re-use.

TECHNICAL SPECIFICATIONS

	PRIBAD 21	PURIBAD
Type	Platform, Rigid Inflatable Boat, Aerial Delivery, 21 ft	Platform, Universal, Rigid Inflatable Boat, Aerial Delivery
NATO Stock Number	Not yet assigned	1670-99-320-4793
Part Number	AML 59000	ASE 02767
Length	6.40 m (252 in)	5.51 m (217 in)
Width	2.74 m (108 in)	2.13 m (84 in)
Depth (platform)	720 mm (28.3 in)	Variable - Adjustable
